

## Homework #3

**App Title:** Get Lost

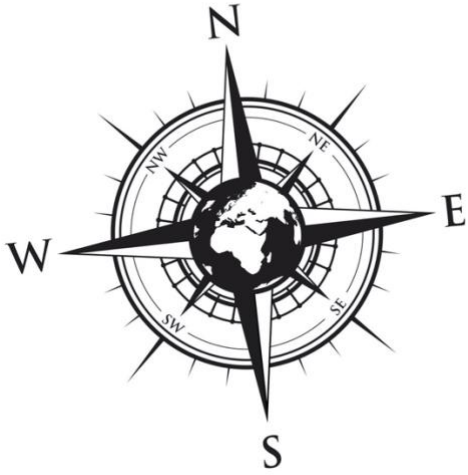

**App Subtitle:** Interactive hiking/outdoors map for location tracking and navigation.

**Elevator Pitch:** Have you ever had the fear of exploring a new hiking trail or hunting spot and not knowing if you are going on the right path? Fear not, Get Lost solves all your navigational fears of the outdoors. Simply download geographical maps of the area you wish to explore and have instance access to location tracking, map layers, way point plotting and many other features that will guide you safely home or back to your campground.

### Sketches:

**Logo:**

Will have to decide background color

**App Category:** Navigation – I chose this because it does primarily fall into the navigation fields of tracking, map layouts and hiking.
